

# MASTER SURGEON IN KIDNEY STONE MANAGEMENT

In partnership with key opinion leaders and industry professionals, SRC developed the Master Surgeon in Kidney stone management procedure (MSKSM) program. The MSKSM program identifies surgeons who provide excellent kidney stone management and are dedicated to continuously improving healthcare quality and patient safety.

## PROGRAM REQUIREMENTS

### 1. SURGICAL EXPERIENCE

The applicant surgeon serves as the primary surgeon for at least 150 qualifying kidney stone management procedures annually.

### 2. EQUIPMENT AND INSTRUMENTS

The applicant surgeon performs kidney stone management procedure in a facility that has a full line of equipment and surgical instruments to provide appropriate perioperative care for their patients. The applicant's facility must have documented training for appropriate staff in the safe operation of this equipment.

### 3. SURGEON DEDICATION

The applicant surgeon has privileges in urology surgery at the facility, is a board-certified surgeon or an active candidate for board certification and has qualified call coverage. Each applicant completes at least 12 hours of CME focused on spine surgery every three years.

### 4. CLINICAL PATHWAYS AND STANDARDIZED OPERATING PROCEDURES

The applicant surgeon formally develops and implements clinical pathways that facilitate the standardization of perioperative care for kidney stone management procedures. The applicant surgeon performs each surgical procedure in a standardized manner and uses a template for operative note dictation that ensures proper collection of data for surgical procedures.

### 5. SURGICAL TEAM AND SUPPORT STAFF

The applicant surgeon has nurses and/or physician extenders and an operative team trained to care for kidney stone management patients and provides ongoing, regularly scheduled staff education in-services.

### 6. PATIENT EDUCATION

The applicant surgeon must provide all kidney stone management patients with preoperative patient education, have a process for obtaining informed surgical consent and selecting procedures that are most appropriate for each patient's condition.

### 7. CONTINUOUS QUALITY ASSESSMENT

The applicant surgeon must collect outcomes data on all patients who undergo kidney stone management procedures in SRC's Outcomes Database (or a similar qualifying database).

This is a summarized list of program requirements which is subject to change. For additional information, please contact SRC by emailing [businessdevelopment@surgicalreview.org](mailto:businessdevelopment@surgicalreview.org) or calling 919.614.2623.
